

SAMPLE TESSELLATIONS: The pictures below show how the characters in TessieXtraBirds form tessellation patterns. The first column shows images formed with TessieXtraBirds-Regular, the second from TessieXtraBirds-Outline, and the third column shows the alphanumeric characters used. Some of the patterns use weird letter spacing. To get the colors you want, it may be easiest to assign colors when the characters are displayed as alphanumeric characters.

Leading must be the same as point size for the rows to line up properly.
